

Civil Engineer-In-Training (EIT)

Our rapidly growing firm has several Civil EIT opportunities for qualified individuals seeking an accelerated career in land development engineering. The Civil Engineer-In-Training works under the direction of a P.E. designing and preparing plans for various land development projects, as well as assisting our construction crews in the field to implement those plans.

Responsibilities include optimizing site layouts; designing roads, water distribution systems, sanitary sewer networks, and drainage systems; preparing and submitting plans to city governments; preparing necessary permitting applications; and preparing stormwater management and erosion control plans. Design work and plan preparation is performed in AutoCAD. Other engineering software packages are used as required. Previous AutoCAD experience is not required, but will be a definite advantage for the candidate.

Minimum Qualifications for EIT Applicants

We're looking for applicants with the following minimum qualifications:

- B.S.C.E. degree from an accredited university (at the time of hire)
- Demonstrated academic success (minimum overall GPA of 3.0)
- Proven success in engineering courses
- Engineering internship, co-op, or other work experience
- Ability to pass a drug and criminal background check
- 0-2 years of experience as an EIT (no work experience required)

Applicants are encouraged to address these minimum qualifications and explain how he/she is qualified in a cover letter.

How to Apply

If you meet our minimum qualifications, and you're looking for an opportunity with great career progression potential, please forward a cover letter with your resume to inquiries@yalgoengineering.com.
